Bring color to your business.

Enhance your product through embroidery. Embroidery quality known worldwide and proven reliability.

The outstanding quality and durability of industrial embroidery machines, condensed into a compact body. Bring color to your business with SAI, the model that offers high quality finishing with production power.

Functional beauty from industrial designer Toshiyuki Kita

Having been active since 1969 producing designs in both Italy and Japan, Kita has been the design force behind a huge number of popular pieces of furniture, home appliances, robots, and everyday domestic items produced by Italian, German, and Japanese manufacturers. Many of his works are featured in the permanent collections of such galleries as the Museum of Modern Art in New York. Winner of the 2011 ADI Compasso d'Oro International Award in Italy.

Capable of professional quality finish using 8 colors.

With SAI, it is possible to embroider designs with threads of up to 8 colors, just like that. Its layout makes it easy to change threads. With a structure that inherits the high performance of industrial embroidery machines, fine lines and wide areas can also be beautifully embroidered.

Exceptionally fast

SAI can complete 800 stitches a minute. It can maintain this high speed during stitching.

Easy operation using a touch panel

Even those new to the art of embroidery will quickly pick up on how to use the touch panel to prepare the machine to embroider.

"TAJIMA Writer PLUS" can easily convert hand drawn artwork into embroidery data.

You can easily make original items by combining lettering with an existing design. Connecting SAI to a computer, allows you to send the embroidery data directly to the machine.

(TAJIMA Writer PLUS OS: 64-bit computer and on/after WINDOWS 7)

Lettering can be selected on the operation panel

Enter the letters on the operation panel, the embroidery data can be generated on the machine. There are 3 different sizes for each font.

Fonts selectable from the touch panel
